Portal Savings

[F21562] – The 2022 CAQH index has been released, and the Portal Savings report has been updated to reflect the newest cost estimates. In addition, the report has been modified to show the year-over-year change in portal savings based on the activity and costs in each year.

Group Renewal and Review

Dependent Aging Out

[F21695, F21860] – This report has been updated to exclude adult dependents by default. In addition, the vMEMEBER.[Dependent Aging Out] column is now used to filter the list allowing for the members in FL to age to 30 before appearing.
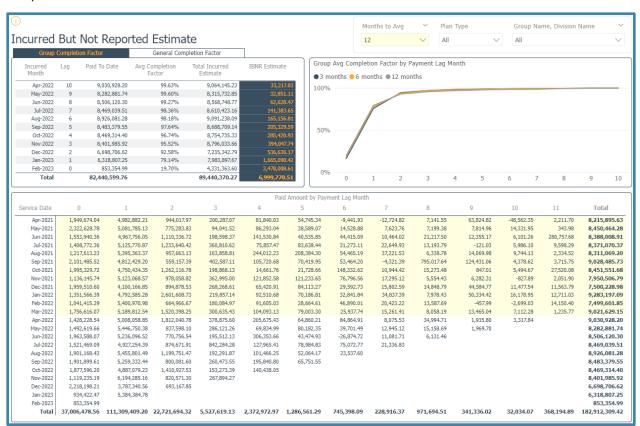

Operations

Incurred But Not Reported Estimate

This report has been moved from being a secondary page in the Claim Utilization story to the Operations story. It allows the User to select the number of months (3, 6, or 12) that will be considered when calculating the Average Completion Factor that is then applied to the Paid to Date for the most recent 11 months.

Users can also apply the General Completion Factor which is calculates using the whole book of business. This is useful for groups that do not have enough historical data needed when calculating the Average Completion Factor.
