Grouping Logic and Documentation			
<ul style="list-style-type: none"> • Chronic Condition Grouping Logic • Avoidable ER Visits • CAQH Index Portal Savings Report • CAQH Historical Report Page 			

Model Changes

New Tables

-

New Columns

-

New Measures

- **[Subscriber Count]** This is the same measure as [Member Count – Subscriber], just with a more recognizable name.
- **_Common Measures** New display folder that holds commonly used measures in ad hoc reporting. This folder is there to make it easier for users to find the most used measures. This is an additional display folder, and the measures will also still appear in their normal display folder.

The screenshot shows the Power BI interface with two panels open: 'Personalize' and 'Columns'. The 'Personalize' panel is on the left, showing the visualization type set to 'Table' and the columns 'Billed Amount', 'Allowed Amount', and 'Paid Amount'. The 'Columns' panel is on the right, showing a search bar and a list of measures. The '_Common Measures' folder is expanded, and its contents are highlighted with a red box. The measures listed are: Allowed Amount, Billed Amount, Claim Count, Claimant Count, Member Count, Paid Amount, and Subscriber Count. Below the '_Common Measures' folder, there are also folders for 'Adjudication' and 'Authorizations'.
