

# VALUE-BASED CARE REPORTING

Powered by Quantros

In order to fully realize the benefits of value-based care, payers need a solution that allows them to evaluate provider performance in terms of both quality and cost. VBA has teamed up with our preferred partner, Healthcare Bluebook, to incorporate Quantros quality scores for over half a million physicians and hospitals into our **VBA Analytics Value-Based Care Reporting** solution.

## Combining Cost and Quality Data in a Single Reporting Solution

VBA Analytics already provides robust analysis and reporting of healthcare utilization and costs, and offers insight to help ensure your health plans are performing effectively. Adding Quantros quality scores allows you to take your value-based care reporting to the next level.

## Comprehensive Quality Scores

Quality scores are derived by examining three different areas of performance: mortality, complications and unplanned encounters. The provider's overall quality score is a weighted average of performance in these three key areas. Weighting is based on the number of "at-risk" episodes for each quality metric.

Data is combined among multiple providers to create an episode of care, which allows for a more comprehensive view of the patient's experience. All providers that contributed to the episode of care are responsible for the patient's outcome.

## Better Benchmarking

Quantros uses the most current and expansive CMS outcomes-based data available.

- ✔ 40 million discharges
- ✔ 176 million physician office claims
- ✔ 42 million inpatient claims
- ✔ 704 million outpatient claims
- ✔ Risk and severity adjusted

## Better Information to Determine Network and Plan Designs

With VBA Analytics Value-Based Care Reporting, you can easily determine which providers are performing the best under your value-based care arrangements and make adjustments as needed. You'll be able to:

- ✔ Drive members to high-value providers and hospitals
- ✔ Evaluate the overall performance of your networks
- ✔ Determine which providers to include in your preferred and tiered networks

## Take Your Analytics to the Next Level

VBA Analytics Value-Based Care Reporting is a supporting solution for VBA Analytics. The Quantros quality data is available for any of the VBA Analytics reporting packages (VBA Analytics, VBA Analytics Plus and VBA Analytics Premium).

For more information about VBA Analytics Value-Based Care Reporting, please contact your dedicated VBA Account Executive or email us at [VBASales@vbasoftware.com](mailto:VBASales@vbasoftware.com).
